

UNITED
GROUP OF COMPANIES

ABOUT US

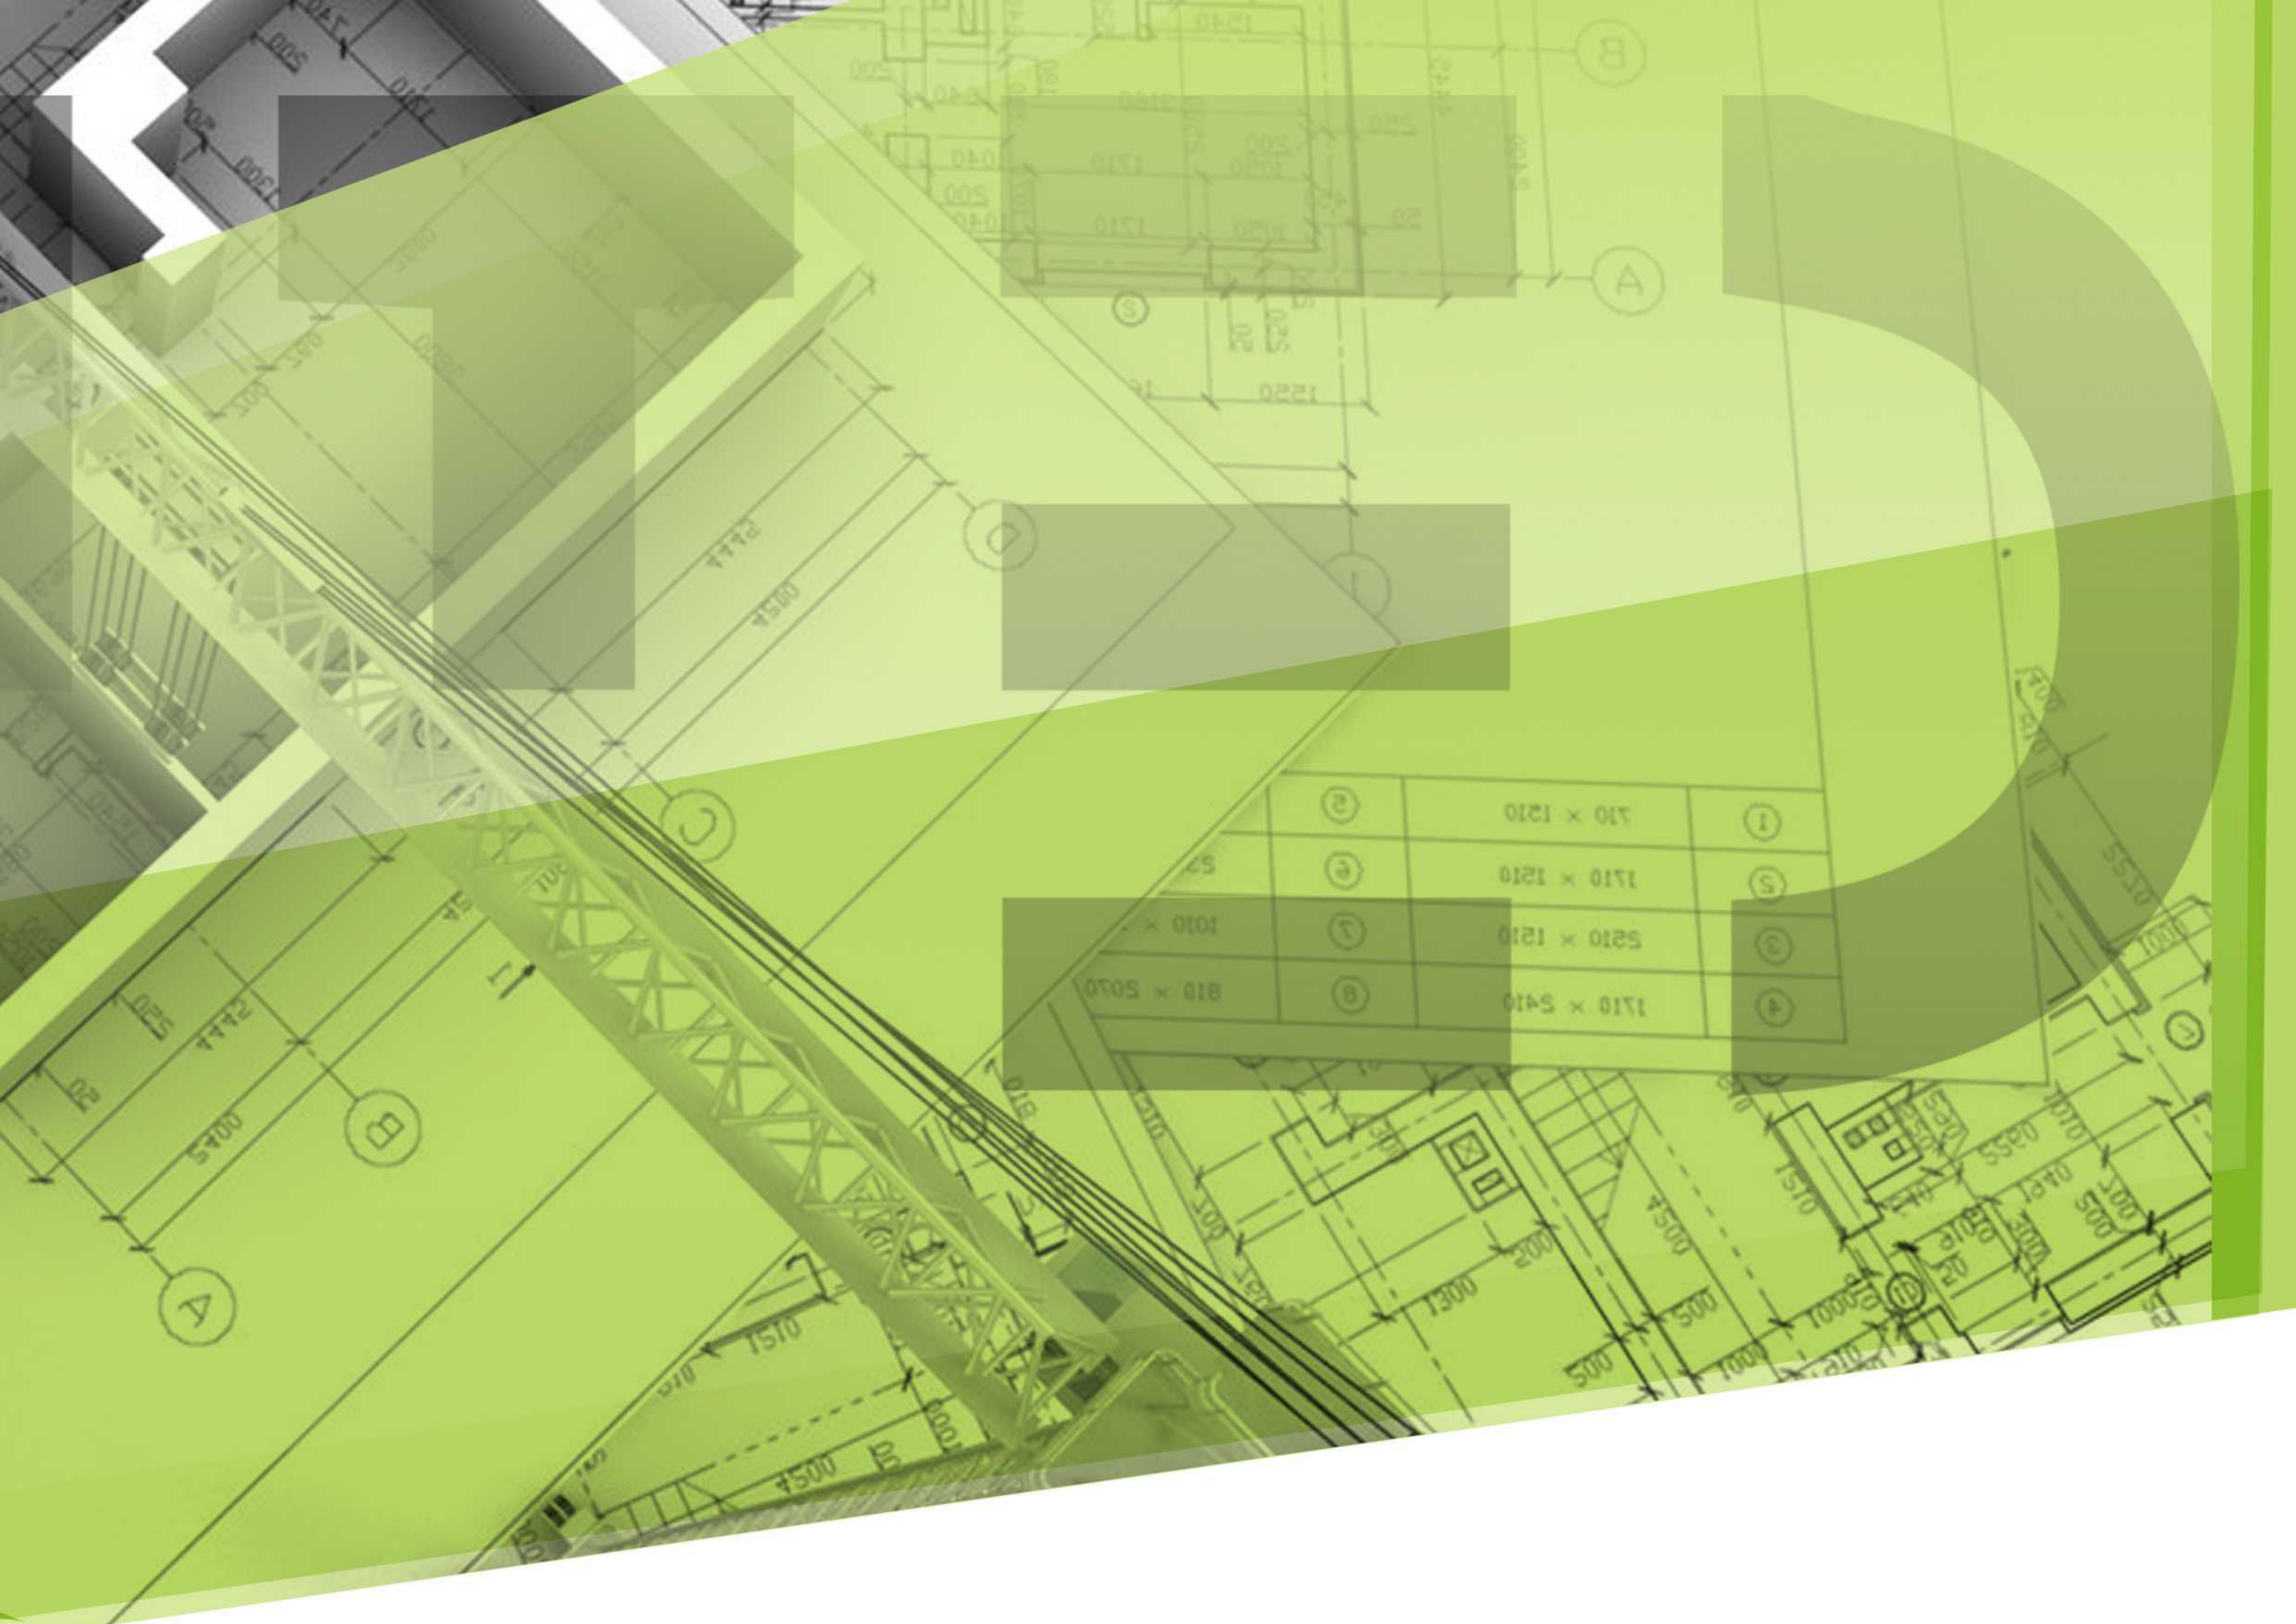

Founded in 1980, United Group of Companies was born out of a vision shared by 4 friends, Rajesh Shah, Himmat Senghani, Navin Patel and Chhagan Patel.

What started off as a humble venture three decades ago has now turned into an esteemed organization in the civil construction business with renowned clients attached to its portfolio.

We approach every project as a team; partnering with our clients through every step of a project's process; while maintaining open communication. We consistently have met and exceeded clients' expectations by delivering projects on time, every time.

Consequently, more than 70% of our business comes from existing clients who have been more than satisfied with our service over the years.

At United Companies, we don't believe in mediocrity, but in perfection. Our merit lies not just in our huge ambitions but in our ability to successfully achieve them.

VISION

Be the industry leaders and always the first to scale new heights with every project we undertake.

As Walter Hagen rightly said:

"No one remembers who came in second"

MISSION

To focus on value engineering, quality and time, thus becoming the contractor of choice for our clients, the employer of choice for our people and set the highest standards for ethics, quality and safety.

STRENGTH

With over 35 years of experience in the construction business and a strong team of over 4500, United Companies has become quite a trusted name in the Civil construction domain.

We're proud to have work experience not just in India, but also UK, Dubai and other Gulf countries.

Our quest for excellence remains unsatiated as we continue to challenge ourselves to achieve our ambitious goals.

CORE VALUES

- Reputation is Everything, We strive to maintain it.
- Commitment to safety and sustainability.
- Excellent Project Execution using latest and the most efficient technology.
- Maximum Return on Investment through cost-effective techniques and stringent schedule control.
- A partnership culture founded on mutual trust and support.
- Be the trend setters in whatever we build with our Innovation and creativity

EXPERTISE

We have erected virtually every type of structure from triple basements, double podium residential towers, IT parks to commercial spaces. We have successfully worked through challenges ranging from tight timelines to bad weather conditions without compromising the quality of work. At United Companies, we bring unprecedented experience and expertise to every project, instilling confidence and certitude in our clients.

With changing trends and advancement in technology, we have constantly updated ourselves to be at the top of the game, discarding obsolete methods. For instance, the use of designing softwares like MS Project, Primavera, AutoCad and Walkie-Talkies at site for effective co-ordination and control on our staff and labor.

SPECIALITIES

Our speciality lies in working under pressure with quick mobilization and meeting deadlines without compromising the quality of work. We've learned to accept challenges as they come, facing them head-on, no matter how difficult they may seem from the outset.

We are renowned for doing the tasks that may be virtually impossible at the planning stage like fire fighting balcony (Refuge area) 60 feet above the ground level which was approx 90 feet long and 12 feet wide cantilever and an open atrium which was covered by a slab 200 feet above ground which was again 90 feet long and 40 feet wide at Dosti Pinnacle, Thane which was spread over 3,50,000 sq.ft of plot and was 5,00,000 sq. ft. of IT park which was completed in just 2 years!

PROCESS

It gives a great deal of satisfaction that we have never approached any client till date and it's only from the reference of our previous satisfied client's only, that we are been invited to quote for their new projects. That is what we are popular for!

All the drawings are thoroughly studied and the quantities are entered in our estimating software that we have developed by our engineers based on past experience and present condition, so as to quote the most competitive rates.

We match with the latest equipments used in the international construction industry like using of tower cranes, batching plants, concrete pumps; we make a point to maximise the use of Planning softwares like MS project so that we never miss deadlines.

There are many tales to talk about but just one may be enough to prove ourselves. You can test us by giving us an opportunity to prove ourselves.

TOOLS AND MACHINERY

List of Major Tools and Machineries

Tower cranes	10 nos.
10 x 7 Mechanical Concrete mixer	33 nos.
750 Weigh batching mixer	03 nos.
Concrete pumps	02 nos.
Tower hoist lift with Steel scaffolding	29 nos.
	(for high rise buildings)
Electric Vibrators	40 nos.
Petrol Vibrators	50 nos.
Bar Cutting machine	20 nos.
Bar Bending machine	20 nos.
Shuttering material	a) M.S. Doka system (sufficient for) 1,00,000 sq.ft
	b) Props and Span (sufficient for) 1,00,000 sq.ft
